IT24102614 - KAHADAWALA D. C – Send Alerts and Notifications

Test Case ID	Test Title	Description	Preconditions	Test Steps	Test Data	Expected Output	Actual Output	Status
TC_1	Login before sending notifications.	Verify that HR/Admin can log in and access Notifications.	HR/Admin account exists	1. Open login page 2. Enter valid credentials 3. Navigate to Notifications page.	Username and Password.	Notification's page is displayed with notification list.	Notification's page is displayed with notification list.	Pass
TC_2	Add New Notification.	Verify HR/Admin can create a new notification.	HR/Admin logged in.	1. Click Add Notification 2. Enter title, message, priority 3. Save notification.	1.Title 2.Message. 3.Priority.	New notification appears in list with correct details.	New notification appears in list with correct details.	Pass
TC_3	Send Attendance Alert.	Verify system sends attendance alert to employee.	HR/Admin logged in.	1. Click Add Notification 2. Select type = Attendance 3. Send notification.	1.Type 2.Message.	Employees receive alert in their notification.	Employees receive alert in their notification.	Pass
TC_4	Avoid Duplicate Alerts.	Verify duplicate notification is not sent if task already completed.	HR/Admin logged in.	1. Resend "Missing Details" notification despite updated documents.	Title	System skips sending duplicate and shows warning.	System skips sending duplicate and shows warning.	Pass
TC_5	Mark Notification as Read.	Verify notification status updates when marked read.	At least 1 unread notification exists.	1. HR/Admin clicks Mark Read on a notification.	Notification.	Status changes from Unread to Read, unread badge updates	Status changes from Unread to Read, unread badge updates	Pass
TC_6	Delete Notification.	Verify HR/Admin can delete a notification.	At least 1 notification exists.	1. HR/Admin clicks Delete. 2. Confirm deletion.	Notification.	Notification removed permanently from list.	Notification removed permanently from list.	Pass
TC_7	Notification Details Display.	Verify title, message, type, priority, status, created date are shown.	HR/Admin logged in.	1. Open Notifications page. 2. Check list display.	Existing sample notifications.	All fields (Title, Message, Type, Priority, Status, Created, Actions) visible.	All fields (Title, Message, Type, Priority, Status, Created, Actions) visible	Pass
TC-8	Filter Unread Notifications.	Verify unread filter works correctly.	Mix of read and unread notifications exist	1. Check Unread Only box. 2. Click Apply.	Notifications.	Only unread notifications are displayed.	Only unread notifications are displayed	Pass
TC_9	Notification Sorting by Date.	Verify notifications are sorted by created date.	HR/Admin logged in, multiple notifications exist.	1. Open Notifications page 2. Observe order of notifications.	Notifications created at different times.	Notifications list shows latest first.	Notifications list shows latest first.	Pass
TC_10	Bulk Notifications Handling.	Verify system handles large-scale sending.	HR/Admin logged in, 100+ employees exist.	1. Send notification to all employee.	Notification.	All employees receive notification without system crash.	All employees receive notification without system crash.	Pass

IT24102607 - IRUSHI UMANDA M. M. A – Track Attendance

Test Case ID	Test Title	Description	Precondi tions	Test Steps	Test Data	Expected Output	Actual Output	Status
TC_1	Successful login with valid credentials	Verify that an employee can log in with correct username and password.	Employee account exists.	1.Navigate to login page. 2.Enter valid username and password. 3.Click “Login” button.	Username: emp01, Password: 12345	System logs in and redirects to attendance dashboard.	System logs in and redirects to attendance dashboard.	Pass
TC_2	Login attempt with invalid credentials	Verify that login fails with incorrect credentials.	Employee account exists.	1.Enter wrong password and attempt to login.	Username: emp01 Password: wrong123	Error message displayed: "Invalid username or password".	Error message displayed: "Invalid username or password"	Pass
TC_3	Add new attendance record (check-in)	Verify that system allows adding a new attendance record when employee checks in.	Employees logged in.	1.Navigate to “Add Attendance” 2.Fill form 3.Submit.	Employee ID: 1001, Date: 27-09-2025, Time: 09:02	Attendance record saved successfully.	Attendance record saved successfully.	Pass
TC_4	View all attendance records	Verify that user can view complete attendance list.	Attendanc e records exist.	1.Navigate to “View Attendance” 2.Click “All Records”.	N/A	System displays all records in table format.	System displays all records in table format.	Pass
TC_5	Filter attendance by date	Verifying that system correctly filters attendance by selected date.	Attendanc e records exist.	1.Apply date filter = 27-09-2025	Date: 27-09-2025	System shows only records from that date.	System shows only records from that date.	Pass
TC_6	Filter attendance by employee	Verify that user can view attendance of a specific employee.	Records exist for employee 1001.	1.Apply filter 2.Employee ID = 1001.	Employee ID: 1001	Records for employee 1001 displayed.	Records for employee 1001 displayed	Pass
TC_7	Correct late arrival record	Verify that admin can update/adjust an existing attendance record.	Record exists.	1.Select record 2.Edit arrival time 3.Save changes.	Old Time: 09:10 → New Time: 09:00	Record updated successfully.	Record updated successfully.	Pass
TC_8	Update missing punch record	Verify that missing checkout time can be corrected	Record exists with missing punch.	1.Open record 2.Add missing checkout time 3.Save.	Checkout Time: 18:05	System updates record correctly.	System updates record correctly.	Pass
TC_9	System updates record correctly.	Verify that user can delete a duplicate record.	Duplicate record exists.	1.Select duplicate 2.Click delete 3.Confirm.	Record ID: A123	Record deleted successfully.	Record deleted successfully.	Pass
TC_10	Prevent deletion of valid record without confirmation	Verify that system asks confirmation before deleting any record	Record exists.	1.Try to delete valid record.	Record ID: A124	System shows confirmation message “Are you sure?”	System shows confirmation message “Are you sure?”	Pass

IT24102627 - FERNANDO W. D. N – Monitor Performance

Test Cas e ID	Test Title	Description	Preconditions	Test Steps	Test Data	Expected Output	Actual Output	Status
TC_P ERF_01	Add New Performance Feedback - Valid	Verify that a Team Lead can add a new performance record with valid feedback and rating.	1. User (Team Lead) is logged in. 2. Target employee exists in the system.	1.Navigate to "Performance" section. 2. Select target employe. 3. Click "Add Feedback". 4. Enter feedback and select a rating. 5. Click "Save".	Employee: Chamika Jayasundara Rating: 4/5 Feedback: "Excellent work on the recent project deadline."	Confirmation message: "Performance record added successfully." New record appears in the performance history.	Confirmation message displayed. Record appears in history.	Pass
TC_P ERF_02	View Performance History	Verify that a user can view the performance history of an employee.	1. User (HR Manager) is logged in. 2. Employee has existing performance records.	1.Navigate to "Performance" section. 2.Search for an employee. 3. Click "View History".	Employee: Tharushi Senanayake	A list of all past performance records with dates, ratings, and feedback is displayed.	List of past records displayed correctly.	Pass
TC_P ERF_03	Update Existing Performance Feedback	Verify that a user can update an existing performance record's rating and feedback.	1. User (Team Lead) is logged in. 2. A performance record exists for the employee.	1.Navigate to the performance history of an employee. 2. Select an existing record. 3. Click "Edit". 4.Change the rating and feedback 5. Click "Save".	Record ID: PERF_102 New Rating: 5/5 New Feedback: "Updated: Exceeded all expectations."	Confirmation message: "Performance record updated successfully." The changes are reflected in the history.	Confirmation message displayed. Changes reflected.	Pass

TC_P ERF_ 04	Delete a Performance Record	Verify that an Admin/HR user can remove an old or incorrect performance record.	1. User (HR Manager) is logged in. 2. A performance record exists.	1.Navigate to the performance history. 2. Select a record. 3. Click "Delete". 4.Confirm the deletion in the dialog.	Record ID: PERF_055	Confirmation message: "Record deleted successfully." The record is removed from the history.	Confirmation message displayed. Record removed.	Pass
TC_P ERF_ 05	Add Feedback - Invalid Rating (Too High)	Verify the system correctly handles an invalid rating value above the maximum.	1. User (Team Lead) is logged in. 2. Target employee exists.	1.Navigate to "Performance" section. 2. Select an employee. 3. Click "Add Feedback". 4. Enter a rating above the maximum allowed. 5. Click "Save".	Rating: 6/5 Feedback: "This is a test."	Error message: "Rating must be between 1 and 5." The record is not saved.	Error message displayed. Record not saved.	Pass
TC_P ERF_ 06	Add Feedback - Empty Required Fields	Verify the system prevents submission when required fields (like rating) are left blank.	1. User (Team Lead) is logged in. 2. Target employee exists.	1.Navigate to "Performance" section. 2. Select an employee. 3. Click "Add Feedback". 4. Leave the 'Rating' field blank. 5. Click "Save".	Rating: (Blank) Feedback: "Feedback with no rating."	Error message: "Rating is a required field." The form is not submitted.	Error message displayed. Form not submitted.	Pass
TC_P ERF_ 07	Access Performance Page - Unauthorized User	Verify that a regular Employee without permissions cannot access the performance management section.	1. A regular Employee user is logged in.	1. After login, try to navigate to the main "Performance" page URL or menu.	N/A	Access is denied. User sees a "Access Denied" or "Unauthorized" message and is redirected to their dashboard.	"Access Denied" message displayed. User redirected to dashboard.	Pass
TC_P ERF_ 08	Update Feedback - Unauthorized User Fails	Verify that a user cannot edit a performance record created by another manager.	1. User (Team Lead A) is logged in. 2. A performance record exists that was created by a different Team Lead (B).	1.Navigate to the performance history of an employee. 2. Find a record created by another manager. 3. Attempt to click "Edit".	Record ID: PERF_201 (Created by Team Lead B)	The "Edit" button is disabled or hidden. If attempted via URL, an "Access Denied" message appears.	The "Edit" button was visible and clickable, but an error occurred upon saving.	Fail
TC_P ERF_ 09	System Performance with Large Data Set	Verify the system loads performance history within 3 seconds when an employee has many records (e.g., 100+).	1. User is logged in. 2. An employee has over 100 performance records in the database.	1.Navigate to the performance history of the employee with many records. 2. Note the time taken to load the page.	Employee: Test_Employee_001 (with 150 records)	The page loads completely within 3 seconds.	The page took 7 seconds to load all records.	Fail
TC_P ERF_ 10	Visualize Performance Trends - Data Mismatch	Verify that the performance trend chart accurately reflects the data in the history table.	1. User is logged in. 2. Employee has multiple performance records with varying ratings over time.	1. View an employee's performance history in table view. 2. Switch to the "Trends" or "Chart" view. 3. Compare the chart data points to the table records.	Employee: Chamika Jayasundara	The line/bar chart correctly plots the ratings from the table against their respective dates.	The chart displayed a rating of '3' for a date where the table showed a '5'.	Fail

IT24102669 - SATHSARANI M. B. N. K – Manage Employee Profiles

Test Case ID	Test Title	Description	Preconditions	Test Steps	Test Data	Expected Output	Actual Output	Status
TC1	Add employee with valid data	Verify that an HR Admin can successfully add a new employee to the system.	1. HR Admin is logged in. 2. On the "Manage Employee Profiles" page.	1. Click "Add New Employee". 2. Enter all required fields with valid data. 3. Click "Save".	Employee ID Name Email Department	System validates data, saves the record, and displays a confirmation message.	System validates data, saves the record, and displays a confirmation message.	Pass
TC2	Add employee with invalid email	Verify the system correctly handles invalid data entry during employee creation.	1. HR Admin is logged in. 2. On the "Add New Employee" form.	1. Enter all required fields. 2. Enter an invalid email format in the 'Email' field. 3. Click "Save"	Name Email Department	System displays a specific error message next to the email field.	System displays a specific error message next to the email field	Pass

TC3	View employee profile	Verify that an HR Admin can view the full details of an existing employee.	1. HR Admin is logged in. 2. Employee "John Doe" exists in the system.	1. Search for employee "John Doe". 2. Click on the employee's name or "View Profile" button.	Search Query	The system displays a detailed view of the employee's profile.	The system displays a detailed view of the employee's profile.	Pass
TC4	Update employee contact details	Verify that an HR Admin can edit and save changes to an employee's information.	1. HR Admin is logged in. 2. Employee "John Doe" exists and is being viewed.	1. From the employee profile view, click "Edit". 2. Update the phone number field. 3. Click "Save"	Current Phone	System saves the changes and displays a confirmation message.	System saves the changes and displays a confirmation message.	Pass
TC5	Delete employee with confirmation	Verify the employee deletion process, including the confirmation prompt.	1. HR Admin is logged in. 2. Employee "Jane Smith" exists in the system.	1. Locate employee "Jane Smith" in the list. 2. Click the "Delete" button. 3. In the confirmation dialog, click "OK".	Employee Name	System removes the record and displays a success message.	System removes the record and displays a success message.	Pass
TC6	Cancel employee deletion	Verify that the deletion action can be cancelled.	1. HR Admin is logged in. 2. Employee "John Doe" exists in the system.	1. Locate employee "John Doe" in the list. 2. Click the "Delete" button. 3. In the confirmation dialog, click "Cancel".	Employee Name	The confirmation dialog closes. No changes are made.	The confirmation dialog closes. No changes are made	Pass
TC7	Search for an existing employee	Verify the search functionality returns correct results.	1. HR Admin is logged in. 2. Multiple employees exist in the system.	1. Enter a known employee's name or ID in the search bar. 2. Press Enter or click the search icon.	Search Query	The system displays a filtered list containing matching employees.	The system displays a filtered list containing matching employees.	Pass
TC8	Search for a non-existent employee	Verify the system behaves correctly when a search yields no results.	1. HR Admin is logged in.	1. Enter a non-existent name or ID in the search bar. 2. Press Enter or click the search icon.	Search Query	The system displays a "No employees found" message.	The system displays a "No employees found" message.	Pass
TC9	Admin Officer access to Manage Profiles	Verify that a user with the 'Admin Officer' role can also access the function (Authorization Check).	1. User with 'Admin Officer' role is logged in.	1. Navigate the main menu.	User Role: Admin Officer	The "Manage Employee Profiles" option is accessible.	The "Manage Employee Profiles" option is accessible	Pass
TC10	Attempt access by unauthorized user	Verify that a regular employee without HR/Admin privileges cannot access the management function.	1. A user with only the 'Employee' role is logged in.	1. Navigate the main menu.	User Role: Employee	The "Manage Employee Profiles" option is not visible.	The "Manage Employee Profiles" option is not visible.	Pass

IT24102615 - MAMALGAHA I. G. W. S – Employee Shift Management

Test Case ID	Test Title	Description	Preconditions	Test Steps	Test Data	Expected Output	Actual Output	Status
TC_01	Verify login with valid credentials	Ensure that a user can successfully log in using valid credentials	1. User must be registered 2. User must be on login page	1. Open login page 2. Enter valid username 3. Enter valid password 4. Click 'Login'	Username, Password	User is successfully redirected to homepage	User is successfully redirected to homepage	Pass
TC_02	Verify creating a new shift with valid details	Ensure HR Manager can successfully create a shift with valid details	HR Manager logged in with valid credentials	1. Open Manage Shifts 2. Enter valid shift details 3. Save shift	Shift Name, Shift ID, start time, end time and whether the shift is active	Shift created successfully	Shift created successfully	Pass
TC_03	Verify updating an existing shift with valid details	Ensure HR Manager can successfully update shift details	1.HR Manager logged in with valid credentials 2. Shift already exists	1. Select existing shift 2. Enter updated valid details 3. Save shift	Updated Shift Name, Shift ID, updated start time, updated end time	Shift updated successfully	Shift updated successfully	Pass
TC_04	Verify assigning an employee to a shift	Ensure HR Manager can assign an employee to a valid shift	1.HR Manager logged in with valid credentials 2. Employee exists	1. Select shift 2. Add employee 3. Save assignment	Employee ID, Shift details	Employee assigned successfully	Employee assigned successfully	Pass
TC_05	Verify assigning multiple employees to shift	Ensure multiple employees can be assigned to a shift	1.HR Manager logged in with valid credentials 2. Employee exists	1. Select shift 2. Add multiple employees 3. Save assignment	Employee IDs, Shift details	Employees assigned to shift successfully	Employees assigned to shift successfully	Pass
TC_06	Verify viewing employees assigned to a shift	Ensure HR Manager can view the list of employees who are assigned to a shift	1.HR Manager logged in with valid credentials 2. Shift exists	1. Select shift 2. Open assigned employees list	Shift Name and Shift ID	List of employees displayed	List of employees displayed	Pass
TC_07	Verify employee notification after shift assignment	Ensure employees receive notification after being assigned to a shift	1.HR Manager logged in with valid credentials 2. Employee assigned to a shift	1. Assign an employee to a shift 2. Check notification	Employee ID, Shift Details	Notification sent successfully	Notification sent successfully	Pass
TC_08	Verify deleting a shift	Ensure HR Manager can delete	1.HR Manager logged in with	1. Select shift	Shift ID	Shift deleted successfully	Shift deleted successfully	Pass

		an existing shift	valid credentials 2.Shift exists	2. Delete shift 3. Confirm				
TC_09	Verify approving a shift change request	Ensure HR Manager can approve an employee’s shift change request	1.HR Manager logged in with valid credentials 2. Employee has submitted a shift change request	1. Open shift change requests 2. Approve request	Employee ID, Requested Shift Details	Request approved successfully	Request approved successfully	Pass
TC_10	Verify unauthorized user cannot access Manage Shifts	Ensure another employee who is not HR Manager cannot access Manage Shifts	User logged in without HR Manager role	1.Log in as another employee who is not HR Manager 2. Attempt to open Manage Shifts	Username and Password	System denies access and shows “Unauthorized Access” message	System denies access and shows “Unauthorized Access” message	Pass

IT24102622 - AMARASINGHE V. A – Manage Employee Roles and Permissions

Test Case ID	Test Title	Description	Preconditions	Test Steps	Test Data	Expected Output	Actual Output	Status
TC01	Add New Role	Verify if a new role can be successfully created.	Admin is logged in and on the “Roles” page.	1. Go to Roles page 2. Click “Add Role” 3. Enter role name and description 4. Click “Save”	Role Name: “Team Lead” Description: “Leads a team”	New role “Team Lead” is created and visible in the roles list.	New Role Successfully Created	Pass
TC02	Add Duplicate Role	Verify the system prevents adding a duplicate role name.	Admin is logged in and “Team Lead” role already exists.	1. Click “Add Role” 2. Enter “Team Lead” 3. Click “Save”	Role Name: “Team Lead”	System displays error message “Role already exists.”	Error Message Shown as ‘Roles Already Exists’.	Pass
TC03	Edit Role Details	Verify that existing role details can be edited successfully.	Admin is logged in and role exists.	1. Select a role from list 2. Click “Edit” 3. Update name or description 4. Click “Save”	Role Name: “Team Manager”	Role details updated and shown in roles list.	Role Successfully Updated.	Pass
TC04	Delete Role	Verify that an existing role can be deleted.	Admin is logged in and role exists.	1. Select a role 2. Click “Delete” 3. Confirm deletion	Role Name: “Intern”	Role is removed from roles list and database.	Role Successfully Deleted.	Pass
TC05	Assign Role to Employee	Verify that a role can be assigned	Admin is logged in, employee and role exist.	1. Open employee details	Employee ID: EMP123 Role: “Team Lead”	Employee is successfully assigned the	Role Successfully Assigned.	Pass

		to a specific employee.		2. Click “Assign Role” 3. Select role 4. Click “Save”		“Team Lead” role.		
TC06	Remove Role from Employee	Verify that a role can be removed from an employee.	Employee is already assigned a role.	1. Open employee details 2. Click “Remove Role” 3. Confirm action	Employee ID: EMP123	Role removed and employee has “No Role” status.	Role Successfully Removed.	Pass
TC07	Assign Multiple Roles	Verify system behavior when assigning multiple roles (if supported).	Employee and roles exist.	1. Open employee details 2. Assign multiple roles 3. Save changes	Roles: “Team Lead”, “HR Manager”	System assigns multiple roles or shows proper message if not supported.	Multiple Roles Successfully Assigned/Cannot Assign Roles.	Pass
TC08	Unauthorized Role Access	Verify that non-admin users cannot access role management.	Logged in as regular employee.	1. Try to access “Manage Roles” page	N/A	System denies access and shows “Access Denied” message.	Shows ‘Access Denied’ Messege.	Pass
TC09	Invalid Input While Creating Role	Verify system validation when entering invalid data for a role.	Admin is logged in.	1. Click “Add Role” 2. Enter special characters or leave fields empty 3. Click “Save”	Role Name: “@#\$\$%”	System shows validation errors and prevents saving.	Shows ‘Invalid Input’ Messege.	Pass
TC10	View Role Permissions	Verify that role permissions are displayed correctly.	Role exists with predefined permissions.	1. Open “Roles” page 2. Click on a role to view details	Role: “Admin”	All permissions for “Admin” are displayed accurately.	Role Permissions Displayed Accurately.	Pass
