Software Engineering (SE2030)

B.Sc. (Hons) in Information Technology

Use Case Scenario 1 – Manage Employee Profiles

Number	1
Name	Manage Employee Profiles
Summary	Allows HR staff and Admins to add, update, view, or remove employee records.
Priority	High
Preconditions	- HR/Admin is logged into the system. - Employee details exist for updates.
Postconditions	- Employee records are updated and saved.
Primary Actor(s)	HR Manager, Admin Officer
Secondary Actor(s)	Employee, System
Trigger	HR/Admin selects 'Manage Employee Profiles'.

Main Scenario

Step	Action
1	HR/Admin logs in.
2	Actor selects 'Manage Employee Profiles'.
3	Actor adds, edits, or deletes employee information.
4	System validates and saves data.
5	System confirms success.

Extensions

Step	Branching Action
3a	If invalid data entered, system displays error.
3b	If deleting, system asks for confirmation.

Open Issues

Issue#	Context
1	Should employees be able to update their own contact details?

Use Case Scenario 2 – Track Attendance

Number	2
Name	Track Attendance
Summary	Gathers daily attendance from employees through a simple form and supports CRUD operations on records.
Priority	High
Preconditions	- Employee must be registered in the system. - Actor logged in as Employee, HR, or Admin.
Postconditions	- Attendance records created, viewed, updated, or deleted as required.
Primary Actor(s)	Employee, HR Manager, Admin Officer
Secondary Actor(s)	System
Trigger	Employee submits attendance form or HR/Admin manages records.

Main Scenario

Step	Action
1	Employee logs into the system.
2	Employee submits attendance through the form (Create).
3	System saves attendance record in the database.
4	HR/Admin views and filters attendance logs (Read).

5	HR/Admin updates records if corrections or approvals are needed (Update).
6	HR/Admin deletes invalid or duplicate entries (Delete).

Extensions

Step	Branching Action
2a	If duplicate entry detected, system notifies HR/Admin for correction.
5a	If approval required (e.g., marking leave), system prompts for authorization.

Open Issues

Issue#	Context
1	Should employees be able to edit or delete their own attendance entries?
2	Should the system auto-flag frequent late arrivals for review?

Use Case Scenario 3 – Monitor Performance

Number	3
Name	Monitor Performance
Summary	Allows leaders to record and review employee performance through feedback, ratings, and training suggestions.
Priority	Medium
Preconditions	- Actor logged in with Team Leader/Manager privileges. - Employee records exist.
Postconditions	- Performance records updated.
Primary Actor(s)	Team Leader, Software Engineer

Secondary Actor(s)	Employee, System
Trigger	Actor selects 'Monitor Performance'.

Main Scenario

Step	Action
1	Team Leader logs in.
2	Actor selects 'Monitor Performance'.
3	Actor enters ratings, feedback, or training suggestions.
4	System stores performance details.
5	Employees may be notified about updates.

Extensions

Step	Branching Action
3a	If performance is poor, system suggests training.
3b	If feedback is incomplete, system prompts for more info.

Open Issues

Issue#	Context
1	Should employees be able to see all performance details?

Use Case Scenario 4 – Manage Employee Shifts

Number	4
Name	Manage Employee Shifts

Summary	Allows HR and Team Leaders to assign, update, and notify employees about work shifts.
Priority	High
Preconditions	- Actor logged in with HR/Team Leader role. - Employee records exist.
Postconditions	- Shift schedule updated and employees notified.
Primary Actor(s)	HR Manager, Team Leader
Secondary Actor(s)	Employee, System
Trigger	Actor selects 'Manage Shifts'.

Main Scenario

Step	Action
1	HR/Team Leader logs in.
2	Actor selects 'Manage Shifts'.
3	Actor creates/updates shifts.
4	Actor assigns employees to shifts.
5	System validates conflicts.
6	System saves schedule.
7	Employees receive notifications.

Extensions

Step	Branching Action
5a	If conflicts exist, system alerts for reassignment.
7a	If employee requests change, request sent for approval.

Open Issues

Issue#	Context
1	Should employees be allowed to self-swap shifts?
2	Should system auto-rotate shifts for fairness?

Use Case Scenario 5 – Send Alerts and Notifications

Number	5
Name	Send Alerts and Notifications
Summary	Sends reminders and alerts about attendance, performance reviews, or missing details.
Priority	Medium
Preconditions	- HR/Admin logged in or system has scheduled events.
Postconditions	- Employees receive alerts.
Primary Actor(s)	HR Manager, Admin Officer
Secondary Actor(s)	Employee, System
Trigger	Actor selects 'Send Notifications' or system auto-triggers.

Main Scenario

Step	Action
1	HR/Admin logs in.
2	Actor selects 'Send Notifications'.
3	Actor chooses type of notification.
4	System delivers alerts to employees.
5	Employees view notification.

Extensions

Step	Branching Action
3a	If task already completed, system avoids sending duplicate.

Open Issues

Issue#	Context
1	Should notifications also go via SMS or WhatsApp?

Use Case Scenario 6 – Manage User Roles and Access

Number	6
Name	Manage User Roles and Access
Summary	IT Support Officer manages accounts, roles, and access permissions.
Priority	High
Preconditions	- IT Support Officer logged in.
Postconditions	- User roles and accounts updated.
Primary Actor(s)	IT Support Officer
Secondary Actor(s)	Employee, System
Trigger	Actor selects 'Manage Roles and Access'.

Main Scenario

Step	Action
1	IT Support logs in.
2	Actor selects 'Manage Roles and Access'.
3	Actor creates/updates/deletes user accounts.

4	Actor assigns roles.
5	System enforces access rights.

Extensions

Step	Branching Action
3a	If password reset needed, system emails employee.
4a	If invalid role assigned, system prompts correction.

Open Issues

Issue#	Context
1	Should the system support multi-factor authentication?
